

FLEX TOY

TM

Engagement through variation

Flex Toy combines spinning motion toys, sound, and rotating LED light patterns to make sure that each activation is different. Use as a standalone system or incorporate it into an existing Flex VRA video system for complete wireless control.

Non-traditional toy VRA.

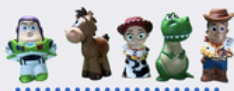

Engagement through variation

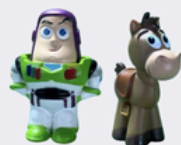

Optional Character Packages

Add additional character sets — \$150 per package (5 characters)

Flex Toy's lift up cover is designed to make swapping characters between tests easy.

Toy Story

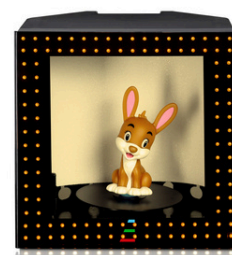

Cars

Mickey and Friends

Princesses

Toy or Video?

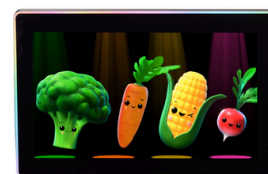

Flex Toy becomes even more powerful when paired with a Flex VRA system.

Together they create a complete hybrid reinforcement setup with up to six reinforcers controlled from a single remote.

Toy, video, or a mix of both. One ecosystem. One workflow.

Total flexibility.

FL-EX VRA

Designed and assembled in Austin, Texas.
