

FLEXI HALO™

Works Like Magic

Say hello to Halo. The only transparent screen VRA that provides engaging videos and ever-changing lifelike toys that spin in mid-air.

It's video VRA.
It's toy VRA.
All in one box.

Why Halo?

For years, pediatric audiologists had to choose. Toy? Video? Both?

Now the choice is clear. **Literally.**

Traditional toy VRA loses novelty fast. Video VRA keeps attention but lacks the physical presence that younger children respond to best.

Halo solves both problems in one box. A transparent display delivers high-contrast videos and lifelike toys in one reinforcer.

It's like nothing pediatric patients have ever seen before.
And that's the point.

Specifications

Display	13.3" Transparent LCD
