# FL_EX PC

The Flex PC app lets you control your Flex VRA system directly from your computer wirelessly and seamlessly alongside your audiometer software.
–Create custom hotkeys for VRA activation
–Use it simultaneously while audiometry software is being utilized.
–Completely wireless.  Just plug and play!

## Step 1: Install

Locate the Flex VRA USB and run "Flex VRA Installer".exe.  Flex PC will install on the computer and place a shortcut icon on the desktop called "Flex PC."

FlexPC

## Step 2: Plug In

Locate the Flex VRA USB Transmitter (PC Host) and insert it into the computer.

FLEX www.flexvra.com  CE UK
Model: Flex-USB-1  Made in Korea
FCC ID: YI5-USB01
IC : 9065A-USB01  PC HOST

**"PC Host"**

## Step 3: Launch

Double click the desktop Flex PC icon to launch Flex PC.  **If the Flex PC window opens and the buttons respond, installation is complete.**
You can now control your Flex VRA:
- Activate Left, Right, and Center VRA
- Create custom hotkeys in Setup
- Adjust transparency to float over audiometer software

Flex VRA PC Control (Hotkeys ACTIVE! Go to File Menu to temporarily suspend hotkeys.)     — ☐ ✕
