Visual Reinforcement Operant Conditioning Audiometry

Better engagement. Better results.

The Flex VROCA Button lets the child answer for themselves. When they hear the sound, they press the button and the Flex monitor rewards them.

Wireless

No cables in the booth, so children respond naturally without shifting posture or attention.

Battery-free

Each press powers the button itself. There are no batteries to change, ever.

Made for Flex VRA

Pre-paired and ready out of the box, with precise control over how long the reward plays.

The result: more consistent responses and greater confidence in behavioral test results.

Specifications

Designed for fast, reliable clinical use
