SOUND BOOTH PRIVACY SCREEN FOR PEDIATRIC AUDIOLOGY

Be heard. Not seen.

Flex Cover reduces visual distractions through sound booth windows while preserving clear clinician visibility of the patient. The magnetic, remote-controlled cover lets the audiologist see into the booth while preventing the patient from seeing out, helping maintain focus during testing.

Control room: cover lowered over the booth window

Inside the booth

- ✓ Visual control during pediatric testing
- ✓ Magnetic mounting for quick, non-invasive installation
- ✓ Battery-powered motor with wireless control
- ✓ Rechargeable, for periodic charging or continuous use

Window Cover

FLEX-WINDOWCOVER

3 ft × 3 ft. Fits standard booth windows.

Door Cover

FLEX-DOORCOVER

5 ft × 18 in. Fits the larger window panels on booth doors.

Each includes the cover, magnetic mounts, remote control, USB-C charger and a 1-year warranty. Custom sizing is available for individual booths.
