FLEXIBLE AND CUSTOMIZED VRA

Flex VRA is designed to attract and maintain attention by offering the widest variety of stimuli that can be controlled by the audiologist. In addition, Flex gives complete volume control from the remote, distract functionality, and the ability to upload your own custom content. **THIS ASSURES YOUR PATIENT GETS THE BEST POSSIBLE HEARING TEST EXPERIENCE.**

WHY BUY FLEX VRA?

PERFORMANCE AND FLEXIBILITY

Enjoy these advanced features:

1

Multiple stimuli including cartoons, animals and toy videos with or without light border

2

Easily upload your own custom content

3

Distract mode to keep the patient still during otoscopy, tympanometry or OAE testing

4

All content comes with playful music that can be volume controlled from the remote
